

I am very disappointed to hear that there are parties trying to stop one the best creations ever. I have had XM Radio over a year now and believe that their is nothing wrong with them having traffic and radio stations. I recently traveled and before I got into major cities I was able to check the XM Radio stations versus waiting to get a signal from local channels. Once you do get a signal you have to find the radio station and then wait for the next traffic report. If I was to do that I would be in the thickness of traffic. I request that you discontinue your pursuit to band any XM Stations. They are a great company and are giving a good product and service to the consumers.
